

16.317: Microprocessor Systems Design I

Fall 2015

Lecture 15: Key Questions

October 13, 2015

1. Describe the issues involved in accessing data in assembly, including the two general factors the compiler must account for.
2. How does a program handle statically allocated data (data allocated at compile time)?

3. How does a program handle data that are dynamically allocated when a function is called?

4. Describe the structure of a typical x86 stack frame.
