

16.216: ECE Application Programming

Fall 2011

Lecture 32: Key Questions December 2, 2011

1. Explain the use of the `fopen()` function.
2. Explain the use of the `fclose()` function.
3. Explain how `fscanf()` and `fprintf()` are used for formatted file I/O.

4. **Example:** Write a program to:
- Read three integers from file `myinput.txt`
 - Determine the sum and average of those values
 - Write the original values, sum, and average to file `myoutput.txt`.

- 3
