

Spring 2016

Program 1: List of Deductions

Note: Remember that the rubric for Program 1 is slightly different than most of your assignments, where all points are based on the program. For this assignment, the program is worth 30 points, your introduction is worth 10 points, and e-mailing Dr. Geiger about Dropbox is worth 10 points.

Deduction number	Description	Points deducted
1	Late penalty	Variable
2	Indentation	
2a	All code inside main() should be indented one tab level	-3
2b	Code is not indented consistently	-3
3	File name is incorrect--should be "prog1_simple.c"	-5
4	Program does not compile	-25
5	Output (if program produces little or no correct output, -20)	-20
5a	Program should produce multiple lines of output	-5
5b	Output is missing some information	-5
6	Miscellaneous	
6a	Student has not introduced himself/herself to an instructor	-10
6b	Student has not e-mailed Dr. Geiger to get link to Dropbox folder	-10
6c	Failure to comment out extra code intended to pause program at end (e.g., system("PAUSE"), infinite loop, etc.)	-5
7	Notes (no deductions)	
7a	Future programs will require more comments: at a minimum, you must include a header comment with your name and a brief program description, a comment describing each variable declaration, and a comment for each group of related statements	
7b	Code contains an excessive number of comments--you don't need to comment every line, just each group of related statements	
7c	Header comment should contain your name
