16.216: ECE Application Programming

Spring 2014

Lecture 17: Key Questions March 5, 2014

1. Write a function that:

| • | Given two integer arguments, x and y, store the quotient and remainder of x | / | y into |
|---|---|---|--------|
| | locations specified by arguments q and r, respectively. | | |

• Uses pointers to swap the values of two double-precision variables

PE3: Functions

This exercise functions on the "change problem"—write a program that will, given an amount of change to be returned, determine the minimum number of coins required to fulfill that amount. In this specific problem, the amount is \$2.00 or less, and the coins available are half dollars, quarters, dimes, nickels, and pennies.

Use the space below and on the following page to draw a flowchart for this program.

M. Geiger Lecture 17: Key Questions

Under what circumstances do you use functions? Identify the best opportunity to use a function in this program, and draw a flowchart that incorporates the function, as well as calls to that function.
